

	<u>Housetraining and Crate Schedule</u>	
	Goal behaviour- to make housetraining as errorless as possible while also building crate time for future absences. This is not a “set” schedule but an example. Feed times etc will vary from household to household and so will walk times.	
	Crate overnight Take Pup to pee IMMEDIATELY (carry if needed)	
	Breakfast	
	Fifteen Minutes of “free” time (Use a timer to make sure you do not miss it)	
	Outside for pee	
	Crate for 20 minutes	
	Thirty minutes of free time supervised	
	Outside for pee	
	Crate for at least half an hour, longer if possible	
	Outside for pee	
	Thirty minutes of free time supervised (training, play, outdoors or indoors)	
	Continue same process on and off.	
	Gradually over the next week or two increase times free but continue to keep crate times at least 30 minutes but no more than 2 hours	
	Walks, outdoor play etc are unlimited but the key to this plan as a housetraining plan is to have him learn to hold it so the amount of time crated is to ensure puppy learns to hold it for periods.	
	Make sure puppy is praised and REWARDED for every pee outside.	

Where the Conversation Begins
